

LEE HOLMES

Portfolio 2022

The landing page for Space Tradex features a dark, textured background resembling a celestial body's surface. The title "SPACE TRADEX" is prominently displayed in large, white, sans-serif capital letters. Below it, the subtitle "SOLUTIONS FOR THE COLLECTIVE" is written in a smaller, white, all-caps font. A central button labeled "WHITE PAPER" in white text is set against a dark rectangular background. At the bottom center, the copyright notice "©2022 Acme X" is visible.

NODIUS

nodi.us | noun | no-di-us | nō -dē -əs | A rightful & lawful network of nodes. With the proper team and execution, Nodi.us will position itself as an impartial accounting and archiving gateway on the extra-terrestrial front lines of outward expansion.

CUBESAT NODES

Each moolNode cubesat will run on the Contiki Operating System and will have a range of applicational uses through various software and hardware system configurations.

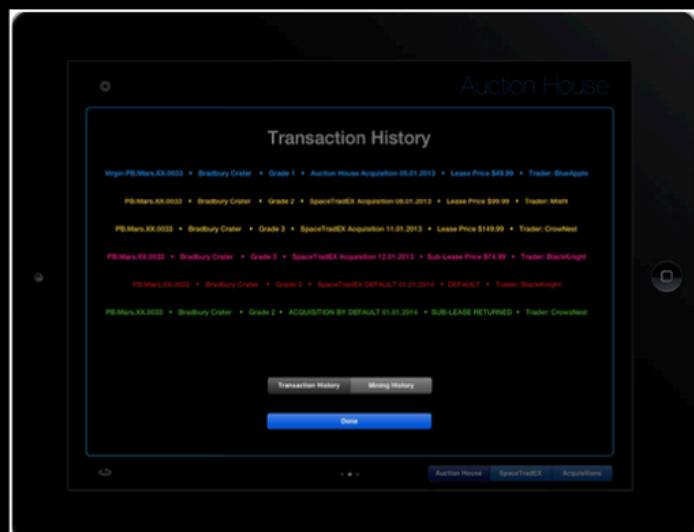

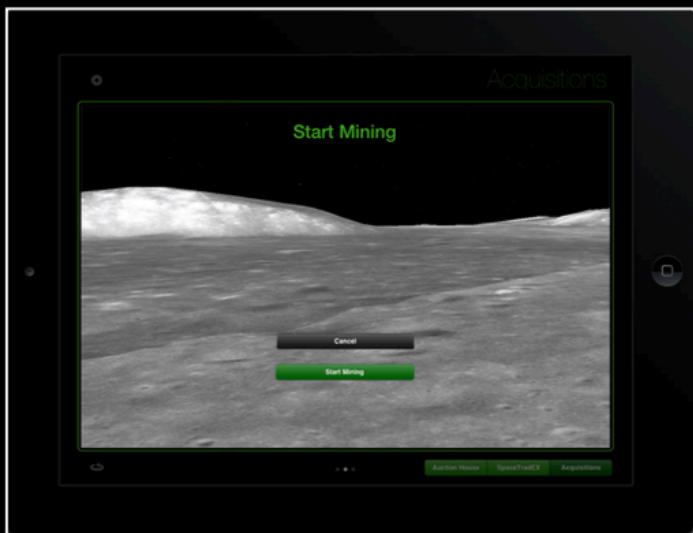

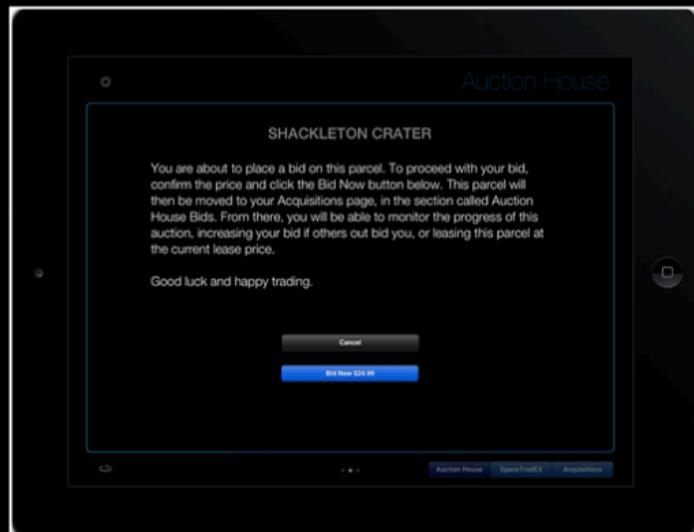

PILGRIM PROGRAM

The Nodius maiden voyage will consist of two moolNode cubesats, one for lunar orbit and the other for the lunar surface. These two moolNodes are the origin of the Pilgrim program.

ORBIT & SURFACE

The Pilgrim Program will use a commercial payload delivery company to reach its objectives on the moon. Astrobotic Technology is one possible delivery company.

MOON SQUATTER

CREATING SOLUTIONS FOR THE COLLECTIVE

ANCHOR STRATEGY

Every journey starts with an initial step. And when our steps sail us into the unknown, at some point our goals will rely on a proper and secure mooring. Nodius is the anchor, Ethereum is the water, Moon Squatter the vessel and the Moon is the sea.

NODIUS

Nodius is an accounting and archiving platform for the moon. By using small personal satellites called cubesats, Nodius will serve as a centralized gateway to the Earth bound decentralized Ethereum network. Only moon pioneers and their technology located on the moon will be able to communicate and submit mission data smart contracts into the Nodius moonNode network. Smart Contracts will then be sent back to Earth's Ethereum Blockchain for consensus verification and historical archiving.

ETHEREUM

Ethereum is unlike most digital currency platforms, as it is not solely a network for transacting monetary value, but rather, a network for powering Ethereum based DAPPS. These open-ended applications can be used on its decentralized network to securely execute a wide variety of services including smart property and property titles. The Ethereum platform is a great solution for storing publicly accessible, secure property titles in the form of smart contracts on the blockchain.

MOON SQUATTER

With smart contracts being completed and filed on the Nodius moon network and relayed back to earth for submission into the Ethereum network, Moon Squatter will serve as a Registry of Deeds between these two worlds. Once a smart contract has made its journey back to Earth, it will be submitted to the Ethereum network for consensus and archiving on the blockchain. The records of the accounts and claims of the moon pioneers will now be publicly available and searchable.

ESSEX EXPLORERS

ALASKA EXPLORATION

ESCAPE TO PRINCE OF WALES IN SOUTHEAST ALASKA

Ready for an adventure? Need to get away to someplace epic?

Prince of Wales Island (POW) in Southeast Alaska is located in the Tongass National Forest. Prince of Wales Island is the third largest island in the United States, with Kodiak Island being the largest and the big island of Hawaii the second largest. POW includes the main island and hundreds of adjacent islands. Prince of Wales Island is 135 miles long and 45 miles wide with 1500 miles of roads, of which only 200 miles are paved. POW is more than 2,600 square miles with 990 miles of coastline, and countless bays waiting to be explored.

NEW ENGLAND TOURS

Gloucester

Gloucester is a coastal city on Cape Ann, in Massachusetts. Its fishing heritage is reflected in the harbor-side Fisherman's Memorial, with a statue and names of those lost at sea. Gloucester is a place for truly authentic adventure, and home to America's oldest seaport.
